

THE IASCOE INSIDER

We did it!
We survived another
certification!
Way to go team!

NASCOE

Benefit Highlight

When protecting all that you've worked so hard for, you want an insurance team that knows who you are, what you do, what your exposures are, and how to manage your situation if faced with an allegation or claim.

Thank you Janelle and Sarah
for representing Indiana at the
North East Midwest Area Rally

NE & MWA Rally Testimony

I would like to thank IASCOE for selecting me as an Indiana delegate to attend the 2025 NEA & MWA Rally in Cortland, NY. This was my first time to represent IASCOE as a delegate at Rally, and it was an absolute amazing experience! Networking with FSA employees from other states and meeting NASCOE officers was a great opportunity at Rally. I learned many employees across the nation are all facing the same challenges with the changes our agency has endured recently, but there are so many people who love their jobs and serving our producers, even in the midst of uncertainty. The speakers and presenters at Rally were top notch and gave us insight on expectations, ideas to use when navigating changes, ways to help one another, and a brief history of changes our agency has seen the past few decades back to 1930. Leadership was very strong during the convention and many words of wisdom were offered. We also got to tour a dairy farm that uses robotic milking to learn how this process works, and take a quick tour of Cornell University. I enjoyed my time as a delegate and would highly recommend attending Rally if ever given the chance.

-Janelle Lasley

NE & MWA Rally Testimony

I had a great time at the NE & MWA Rally. It was my first time going to a rally so I was kind of nervous. Everyone from the other states were so inviting and kind. The meeting with Washington DC and Hunter Moorhead was very informative and I was able to bring a lot back to my co-workers that was helpful in easing the minds of where FSA is heading. The tours were fun, we went to a dairy with robotic milkers, and Cornell University's horticulture and aquaculture departments.
